

**Solving Word Problems within 20 using 3 numbers**

**Directions:** Read each word problem. Draw out the objects. Write the equation using the addition sign. Solve the problem by writing the answer. See example 

Sam Squirrel was hiding acorns. He hid 6 acorns by the creek, 4 under a big rock, and 10 under a pile of leaves. How many acorns did Sam hide all together?

Draw, write the equation, and solve in this box.

Billy Bear was looking for food. He found seven acorns on the ground. Then he found eight berries growing on the vine. Finally, he found four insects under a leaf. How many things did Billy Bear find to eat in all?

Draw, write the equation, and solve in this box.
