

Solving Word Problems within 20 using 3 numbers

Directions: Read each word problem. Draw out the objects. Write the equation using the addition sign. Solve the problem by writing the answer. See example 

Daisy the Deer saw some flowers growing in the meadow. She saw 6 yellow flowers, 7 blue flowers, and 5 orange flowers. How many flowers did she see in all?

Draw, write the equation, and solve in this box.

The 3 Billy Goats Gruff crossed the bridge to go over to the meadow. There they found great food to eat. The small Billy Goat found four oranges to eat. The medium Billy Goat found five apples to eat. The large Billy Goat found six pears to eat. How many pieces of fruit did they find all together?

Draw, write the equation, and solve in this box.
